Part 1 – Annual Budget

1.1 Mayor's Report

The council of Mbizana Local Municipality, as elected by the communities, has a responsibility of ensuring that basic service delivery is provided for all within its jurisdiction. This is the provision of the Constitution of the Republic of South Africa which is the supreme law of the land. The Municipal Finance Management Act No. 56 of 2003, section 16, provides that a municipality must compile an annual budget before the start of the financial year. A draft budget was tabled 90 days before the start of the financial year, which means that for a 2019/20 Annual Budget, the draft budget must be tabled to council by March 31, 2019. This draft budget was in response and compliance to the afore-mentioned prescripts. The draft budget was then taken to communities for consultation where comments were solicited and incorporated when the final budget was being prepared for council to approve at least 30 days before the start of the budget year.

The municipality's development priorities are basic service delivery (Roads, storm water drainage, transport infrastructure, electrification, housing and land use management, educational facilities, community services and related matters, and recreational facilities) and Local Economic Development (agriculture and farming, forestry, tourism development, SMME support, Business, trade and manufacturing).

a) Water and sanitation backlogs

In Mbizana, the current implementation of the Greater Mbizana Regional scheme will take care of at least 85% backlogs after completion and connection to the existing infrastructure.

According to the District Municipality, Mbizana has a total backlog of 31 146 households with no access to Sanitation which translates to 64.34 %.

The estimated backlog for RDP sanitation service delivery is 17423 (36 %) households with no access RDP Sanitation, and 31146(64%) have access to RDP Sanitation (Ventilated Improved Pit-latrines (VIP Toilets)). Out of 31 wards only 8 wards with no sanitation services.

b) Road Maintenance backlogs

Due to the bad conditions of access roads in the entire municipal area, the municipality moved towards insourcing the maintenance of these roads by acquiring own plant. This is in an attempt to maximize the available resources to ensure we maintain as much roads as possible while creating enough capacity within the municipality. The municipality has allocated over R34.6 million within the next three years to support the municipal plant in the maintenance of road infrastructure. The next year's budget allocated is about R11 million which will supplement our own plant that will be utilized to maintain road infrastructure.

The municipality has over the past three years purchased internal yellow plant consisting of Grader, Roller, Water Cart, and Tipper trucks that will be utilised for the rehabilitation and maintenance of existing gravel access roads.

This plant was an addition on the existing plant that the municipality already had. The municipality already had a fully-fledged construction plant (Grader, Roller, water cart, Excavator and tipper trucks).

EPWP contract labourers to maintain the storm water drainage and also to fix the small to medium potholes within our CBD roads are being utilized and that will also continue to be explored in the medium term.

It is planned that a total of 150m² of pothole patching will be completed by the end of the current financial year as the service provider was appointed earlier in the financial year

In 2019/20 financial year, 190m² is planned to be maintained using both external service providers and internal plant.

c) Electrification backlogs and planning

In conjunction with Eskom the Municipality has managed to reduce electricity backlogs from 19000 (39 %) households in 2011 to 9701 (20%) in 2018. This backlog will be further reduced once the on-going projects are completed.

The municipality and Eskom did a 5 year electrification master plan which when completed the municipality would have reached a universal access within its area of Jurisdiction.

Once the projects that are currently under implementation are completed the municipality will be left with a backlog figure of approximately 16 671 households with no electricity.

There is a general increase of electricity demand in Mbizana as new households are constructed. It is against this that the INEP Allocation for 2019/20 will be utilized to complete projects that are currently being implemented with additional households than initially planned. The municipality's electrical capacity has also been under pressure in the past financial years hence the allocation as well to upgrade our line.

d) Environmental, coastal and waste management

The municipality as a coastal municipality has a responsibility to develop an Integrated Coastal Management Program (ICMP) which has been developed and adopted by the councils, both Mbizana Local Municipality and Alfred Nzo District Municipality.

Integrated Waste Management Plan was completed and adopted by Council and has been sent to MEC for approval. The municipality gazetted refuse Removal & sanitary by-laws which are currently being reviewed as per the NEMWA.

The Mbizana Local Municipality has adopted a climate change strategy which has been included in the IDP.

The municipality provides refuse removal service to 1234 households in town, 204 small businesses and 49 big businesses including government departments. The service has been extended to few businesses and institutions outside town. There is 1 licensed landfill site (GSB type) which is still under construction.

1 Dumping site which will be rehabilitated for closure as soon as the Majazi landfill site is operational which is still under construction after some delays due to contractual disagreements between the implementing agent the service provider appointed. That process has since been finalized and a new service provider was appointed and introduced to the municipality, however the construction has not commenced due to social issues within the area that are still being attended to.

The municipality supports recycling initiatives in town while the refuse and sanitary by-laws are under review

e) Local economic development

The following plans were developed, adopted by council and are being implemented:

- LED strategy
- Tourism Plan
- Agricultural Plan
- Spatial Development Framework.

The municipality also initiated Contractor Development programme which has proven to be fruitful and helpful to the emerging contractors.

A total of 16 enrolled contractors were provided with job opportunities, 12 contractors graduated from Grade 1 to different grades up to Grade 6, 40 contractors were trained on Project Management, Tendering Processes, Quality Management Systems, Occupational Health and Safety, and Contracts Management

The Municipality had funded 2 Anchor projects with equipment and machinery and are still fully functional and operating.

- Kati kaBizwayo
- Luvolwam Steel project

WILD COAST N2 TOLL ROAD

SANRAL appointed Academy for the Construction Skills (ACS) to recruit contractors that will be on learnership program for a period of two years.

LTA Grinaiker JV STRABAAG were appointed and introduced to execute Mtentu bridge construction which has since been halted after the appointed service provider withdrew from the contract citing various reasons for doing so.

f) Tourism and Agriculture

The tourism plan was developed and currently under execution.

Mbizana Municipality in partnership with ECPTA, Wild Coast Sun and South Coast Tourism have signed an MOU for the promotion and marketing of tourism.

The Municipality has purchased paddle boats and mountain bikes for Mzamba Ndikini tours which is operating in Mzamba area as part of tourism development

RED HUB:

Funded by ECRDA and Facilitated by the Local Municipality and the DM.

Agro- processing business that has 14 primary Cooperatives and one secondary with 759 Beneficiaries.

The RED Hub has employed 54 people in various Departments.

5 small scale farmers have been funded with an amount not exceeding R100 000 per project.

8 Income Generating Projects have been supported with Agricultural Inputs.

The CWP programme is implemented in 19 wards with 1564 participants and the funding allocated for this programme was R16 518 296.00.

The following wards (04,05,06,07,08,12,13,15,17,18,19,20,22,23,26,27,29,30 and 31) have Agriculture , construction and social sectors

g) Land use and spatial planning

Settlement patterns in Mbizana still reflect, to a large extent, spatial planning of the Apartheid past.

The current structure and spread of rural settlements and households therein makes it difficult for the municipality to provide services in an effective and efficient manner.

The municipality has made strides in redressing the imbalances of Apartheid spatial planning in identifying and providing basic services in those areas that were ignored in the past

Land claims still poses a challenge in development of some areas in town but municipality is in talks with CPAs to resolve those issues.

h) Electrification of villages

The Mbizana Local Municipality has in the recent past endeavored to ensure that electricity is rolled out to a number of villages. This has seen the electrification of the following villages in the 2017/18 financial period which were completed and energized:-

Name of Project	Budgeted Amount	Funding Source
Electrification of Mpetsheni	R 10 748 945	INEP and Provincial Grant
Electrification of Jama Village	R 4 744 544	Provincial Grant
Electrification of Mpisi Village	R 5 295 250	Provincial Grant
5 MVA Backbone line	R 500 000	Provincial Grant
Electrification of Qungebe-Ludeke	R 4 786 906	Provincial Grant
Electrification of Mpindweni	R 4 648 840	INEP

These were funded from the R21 million allocation from the Provincial Department of CoGTA and the remainder of the INEP allocation was used to settle the loan with DBSA that was taken to speed up electrification of villages.

At the beginning of the current year, the municipality had no additional funding to use in the electrification related projects other than the indicated INEP allocations which initially stood at R25 million for the 2018/19 financial year but were later revised to R32.6 million during re-gazetting from which the following projects are being implemented:

Project Name	Allocated amount	Funding Source
Mampingeni, Swane Giniswayo, Lucwaba	R 15 996 381.00	INEP
Diphini, Mandlobe, Madada, Sgodlweni	R 10 492 197.50	INEP
Mdikisweni, Ukhalo, Pelepele	R 11 096 491.20	INEP

TOTAL	R 37 585 069.70	
--------------	------------------------	--

This was still however less than the amounts required to complete projects with the municipality topping up with its own resources to ensure these are completed within stipulated times.

This will result in the electrification of 1250 households when the projects are completed.

For the next three years the municipality will also continue to depend on the INEP electrification grant to implement the projects prioritized to strive towards universal access within the municipality. The allocations for the next budget year have been prioritized according to the following projects which are all anticipated to be completed by the end of 2019/20:

Project Name	Allocated amount	Funding Source
8 MVA backbone line	R 11 000 000	INEP
Diphini, Mandlobe, Madada, Sgodlweni	R 3 700 000	INEP
Mdikisweni, Ukhalo, Pelepele	R 3 200 000	INEP
Electrification of Mathwebu	R 2 800 000	INEP
Electrification of Ludeke village	R 8 787 906	INEP
TOTAL	R 31 240 000	

The backbone line will assist the municipality in increasing its capacity to carry more load and improve electricity supply within the municipality while other allocations will assist in ensuring that more households are added to the list that has access to electricity within the municipal area.

i) Infrastructure development

The municipality also receives a Municipal Infrastructure Grant for the construction of infrastructure assets that enhance service delivery to all communities. The total amount to be received of just above R 48.3 million has been allocated as follows:

NAME OF PROJECT	BUDGETED AMOUNT	
Mphuthumi Mafumbatha Stadium	R 6 472 972.13	MIG
Mbizana Civic Center	R 11 020 764.06	MIG
R61 to Emazweni Access Road	R 2 735 632.08	MIG
Mkhungo to Nkunzi Access Road	R 2 253 279.72	MIG
Mntomkhulu to Gxeni Access Road	R 6 112 184.38	MIG
Bazana Access Road	R 4 250 231.23	MIG
Mgodinin to Mpondo Access Road	R 3 889 796.91	MIG
Mpenkulu to Tulufa Access Road	R 8 209 038.49	MIG
Ext. 04 Bridge	R 1 000 000.00	MIG
Ward 05 Community Hall	R 2 300 000.00	Internal funding
Ward 30 Community Hall	R 2 300 000.00	Internal funding

R 50 543 899.00

The compilation of the 2019/20 annual budget has also taken into consideration the following key considerations that impact directly to our communities:-

Repairs and Maintenance of Infrastructure and other municipal assets: The municipality has an understanding that at least 8% of its budget must be set aside for the repairs and maintenance of the existing infrastructure. As part of its drive to ensure that road infrastructure assets are maintained adequately, earthmoving plant has been acquired over the past two years so that the municipality would be able to carry out its own repairs and maintenance. Maintenance of the CBD roads has also been planned to be done internally using labor intensive methods while budgeting for procurement of materials and tools to carry out this task Road maintenance has been allocated R12 million in response to the recent inclement weather that left a lot of roads and bridges damaged. A further R3.8 million has been set aside for the maintenance of municipal buildings and another R2.8 million for the maintenance of municipal vehicles and plant.

Legacy programmes : The municipality prides itself of being the home of the legendary struggle icons for the freedom of the people of South Africa, Oliver Reginald Tambo and Nomzamo Winnie Madikizela-Mandela. It is a live conviction of this council to ensure that their legacy lives for the generations to come. It is not the wish of this council to only celebrate through events but tangible legacy projects that will ensure that our claim and ownership of these international icons is validated. A budget allocation of R1.9 million has been provided for these important activities.

Public participation: Municipality will continue to embark on community education programs in all wards in order to capacitate our communities on their role during public participation/ hearings on municipal documents. Capacitation of ward committees will also continue getting attention in an attempt to ensure coordinated servicing of our communities as structures closer to people. Program of establishment, launch and support of ward war rooms will continue this financial year as part of strengthening community and stakeholder involvement on government programs. An amount of R3,9 million has been set aside for this.

IDP and performance management: Council will continue to ensure that our IDP maintains its high credibility status through enhancing maximum public participation of all role players. We will continue to ensure that our mission of promoting and ensuring a culture of performance excellence is achieved at all costs. Although resources are very limited, these important planning and monitoring tools have been budgeted for at R430 thousand.

Special Programs and Sport Development: Council will always contribute in changing lives of our special groups, our focus will be towards improving education in our region through supporting educational improving initiatives, we will also be strengthening capacity to community based structures that assist particularly in fighting violence and crimes targeting our elderly, children and women. We will continue to ensure that our council educates our communities on rights of people with disabilities and support initiatives that combats discrimination against them. An amount of just above R3.8 million has been set aside for these special groups.

Implementation of SPLUMA: Implementation of the act and running of the municipal tribunal and payment of the members to sit in the tribunal. The municipal council taken a decision to continue utilizing the district tribunal. The tribunal will consider development applications that will in turn increase the revenue base. We trust that the R682 thousand set aside as well for this purpose will be sufficient.

Geographic Information System (GIS): Acquisition tool to assist to improve the immovable asset. It is the compliance issue for spatial analysis. This will also assist in the identification of municipal assets and their locations. An amount of just above R182 thousand has been set aside for this.

The Annual Budget as compiled by the municipality seeks to address the imperatives as set out in the Integrated Development Plan and the indicated Delivery Agreement – outcome 9, which is to ensure a responsive, accountable, effective and efficient local government system so as to restore the confidence of citizens in the local government sphere. As such municipalities need to ensure that the basic needs of communities are met; build clean, effective, efficient, responsive and accountable local government; improve performance and professionalism and strengthen partnerships between local government, communities and civil society. The Outcome consists of seven outputs which need to be achieved, viz.

- Implement a differentiated approach to municipal financing, planning and support;
- Improve access to basic services;
- Implementation of the Community Work Programme;
- Actions supportive of the human settlement outcome;
- Deepen democracy through a refined Ward Committee Model;
- Improve administrative and financial capability;
- A single window of coordination.

The Mbizana Local Municipality annual budget and the Integrated Development Plan therefore seeks to ensure that the service delivery priorities as mandated by the constitution like electricity, roads, solid waste removal are provided to the communities. This is done at the same time whilst ensuring co-ordination of other organs of state like the District Municipality for the provision of water and sanitation and other provincial departments for respective services to the communities.

1.2 Council Resolutions

The Council of Mbizana Local Municipality met by the 29th of March 2019 to consider the annual budget tabled by the Mayor at least 90 days before the start of the financial year 2019/20 and the Medium Term Revenue and Expenditure Framework. The council must then consider the following resolutions which will become final when the budget is adopted.

The council of Mbizana Local Municipality, acting in terms of section 24 of the Municipal Finance Management Act, (Act 56 of 2003) approves and adopts:

- a. The annual budget of the municipality for the financial year 2019/20 and the multi-year and single-year capital appropriations as set out in the following tables:
 - i) Budgeted Financial Performance (revenue and expenditure by functional classification);
 - ii) Budgeted Financial Performance (revenue and expenditure by municipal vote) ;
 - iii) Budgeted Financial Performance (revenue by source and expenditure by type); and
 - iv) Multi-year and single-year capital appropriations by municipal vote and functional classification and associated funding by source.

- b. The financial position, cash flow budget, cash-backed reserve/accumulated surplus, asset management and basic service delivery targets are adopted as set out in the following tables:
 - i. Budgeted Financial Position;
 - ii. Budgeted Cash Flows;
 - iii. Cash backed reserves and accumulated surplus reconciliation;
 - iv. Asset management; and
 - v. Basic service delivery measurement.
- c. The Council of Mbizana Local Municipality, acting in terms of section 75A of the Local Government: Municipal Systems Act (Act 32 of 2000) approves the following proposed tariffs with effect from 1 July 2019:
 - i) the tariffs for property rates
 - ii) the tariffs for electricity
 - iii) the tariffs for solid waste services
- d. The Council of Mbizana Local Municipality, acting in terms of 75A of the Local Government: Municipal Systems Act (Act 32 of 2000) approves the proposed tariffs with effect from 1 July 2019 the tariffs for other services, as set out in the paragraphs on tariffs;
- e. To give proper effect to the municipality's annual budget, the Council of Mbizana Local Municipality approves:
 - i) That cash backing is implemented through the utilisation of a portion of the revenue generated from property rates to ensure that all capital reserves and provisions, unspent long-term loans and unspent conditional grants are cash backed.
- f. To enable the proper implementation of the municipality's budget, the council of Mbizana Local Municipality approves the following budget related policies;
 - i) The IDP and Budget Policy
 - ii) Credit control and debt collection policy
 - iii) Property Rates Policy
 - iv) Supply Chain Management Policy
 - v) Tariff Policy
 - vi) Asset Management Policy
 - vii) Supply Chain Policy for Infrastructure Procurement and Delivery Management
 - viii) Cash Management and Investment Policy
 - ix) Contract Management policy
 - x) Debtors write-off policy

- xi) Indigent policy
- xii) Contract Management policy
- xiii) Retention policy
- xiv) Cost Containment Management policy that is still going through inputs and workshops

1.3 Executive Summary

As mentioned in the earlier paragraphs, the municipality prioritizes the delivery of basic services to the communities. In an attempt to address backlogs, especially electrification, roads and community facilities, the municipality has been forced to utilize its cash reserves which has put a serious strain on these resources. This means that for the current financial year being budgeted for, and the medium term, the municipality has had to perform a delicate balancing act by ensuring provision of basic services to the communities using the limited resources in a way that ensures that the municipality remains financially viable.

Previous years audit outcomes

The municipality has, in the recent past, ensured that there are improved audit outcomes. This has been a concerted effort between the municipality's council and the management in ensuring that there are improved internal controls, historical issues and disparities in the reported information are dealt with and cleared, and that accounting records and procedures are carried out at appropriate intervals. This has seen the municipality receiving unqualified audit opinions since 2015/16 to 2017/18 financial years. The municipality intends to improve on these achievements and avoid regression at all costs including the formation of a clean audit committee that is tasked with monitoring the implementation of the audit action plan as proposed by management and adopted by council.

mSCOA Implementation

The National Treasury issued a gazette in 2014, directing that a Municipal Standard Chart of Accounts – mSCOA – would be used by all municipalities from July 01, 2017. This meant that all municipalities will have a common set of accounts from which to choose from, instead of each municipality having its own chart of accounts. This will result in a seamless reporting regime where information from all municipalities can be compared. The introduction of the business reform has meant that management needed to acquaint itself with the requirements and legislations that were meant to ensure implementation of mSCOA by July 01, 2017. The municipality complied with this requirement and the migration from the old system to the new system was done seamlessly with the assistance of the municipality's system vendors.

It is important to note that this did not represent a new system, but rather an introduction of a more detailed and streamlined way of doing business, starting from planning, where it guides you to do proper planning, informed by adequate costing. mSCOA also encourages revenue and expenditure items to be identified for what they really are and not grouped together with no detailed planning and calculation behind. We will now be able to identify the true cost of the projects that the municipality engages on, and be able to identify, from early on, the communities that stand to benefit from those projects.

Mbizana Local Municipality is no different and has ensured that measures are put in place to ensure compliance. It is therefore important to note that we have made all efforts to ensure that the budget that will be approved is mSCOA compliant.

The impact of mSCOA on the virement policy

Earlier treasury circulars highlighted the principles that must be incorporated into municipal virement policies. Those principles are still applicable and relevant. The only difference is that a transaction in mSCOA relates to six regulated segments, therefore all segments must be

considered when making a virement. As a result of this we have had to review and update our reference to “vote” to align to the function segment and indicate the funding applicable to the item being transferred in relation to the funding segment. This therefore means that with the implementation of mSCOA, virements can only take place within a function or sub-function and the same source of funding. The creation of new projects and savings across functions can only take place through an adjustment budget. Virements are not permitted from the repairs and maintenance project in the project segment.

Clarification of core and non-core functions

Core functions provides for the matters in terms of section 156 (1) of the Constitution. These are functions performed by local government and constitutionally assigned to local government in terms of Part B of Schedule 4 and Part B of Schedule 5. Non-core functions performed by local government that are constitutionally assigned to provincial government in terms of section 156(4) of the Constitution. Local government are compensated for delivering these functions on behalf of provincial government and typically receive a management fee from the provincial department.

1.4 The South African Economy and Inflation Targets

The economic and revenue outlook has deteriorated since the October 2018 Medium Term Budget Policy Statement (MTBPS). Funding pressures from state-owned companies have increased and require government financial support. Given these developments, the 2019 Budget proposes large-scale expenditure reprioritisation and tax measures that narrow the deficit from 4.5 per cent of GDP in 2019/20 to 4 per cent by 2021/22.

The 2018 MTBPS noted that weak economic performance and revenue shortfalls had contributed to some slippage in fiscal projections. Since then, economic growth has remained subdued and the domestic GDP outlook has been revised down. In the current year, tax revenue will be R15.4 billion below the 2018 MTBPS estimate. Funding pressures from Eskom and other financially distressed state-owned companies have increased, with several requesting state support to continue operating. In this context, the 2019 Budget proposes a series of tax and expenditure measures aimed at narrowing the deficit and stabilising the debt-to-GDP ratio. Additions to spending amount to R75.3 billion over the medium term, consisting mainly of transfers to support the reconfiguration of Eskom. These additions are partially offset by reductions to expenditure baselines and proposed savings from compensation adjustments totalling R50.3 billion. Tax measures raise an additional R15 billion in 2019/20 and R10 billion in 2020/21.

In combination, these measures are expected to narrow the consolidated budget deficit from a projected 4.5 per cent of GDP in 2019/20 to 4 per cent of GDP in 2021/22. Gross national debt is projected to stabilize at 60.2 per cent of GDP in 2023/24. Net loan debt (gross loan debt excluding government's cash balances) stabilises at 57.3 per cent of GDP in 2024/25.

The GDP growth rate is forecasted at 1.5 per cent in 2019, 1.7 per cent in 2020 and 2.1 per cent in 2021. The revisions take into account weaker investment outcomes in 2018, a more fragile recovery in household income and slower export demand than expected due to moderating global growth. Consumer inflation has also been revised down due to lower oil prices and food inflation than previously assumed.

The main risks to the economic outlook are continued policy uncertainty and deterioration in the finances of state-owned entities. These factors, alongside continued high unemployment and slow growth will continue to exert pressure on municipal revenue generation and collection levels hence a conservative approach is advised for municipal revenue projections. Municipalities affected by the drought should also consider its impact on revenue generation. In this context,

municipalities will have to improve their efforts to limit non-priority spending and to implement stringent cost-containment measures.

Budget Assumptions

As the municipality provides services to the communities, a significant amount of costs are incurred and these must be recovered somehow from the consumers. This is where the issue of tariff setting comes in, and we have in this regard been guided by the municipality's performance in the previous financial years, and the guidelines set by the National Treasury in numerous circulars, last of which was MFMA Treasury Circular No. 93 and 94. According to this circular, municipalities must consider the following consumer price index or inflationary indications:

Fiscal year		2018/19 Estimate	2019/20	2020/21 Forecast	2021/20 Forecast
Consumer Price Inflation - CPI		4.7%	5,2%	5,4%	5,4%

This means that any increase in the tariff increases and expenditure forecasts beyond the 3 - 6% need to be comprehensively motivated and explained. This means that to a large extent, some trading services remain heavily subsidized by other sources of revenue, a situation which needs to be changed as the council and management comes up with strategies of addressing this. It is clear for example that the solid waste removal is still heavily subsidized by other sources of revenue and the tariffs for this service cannot just be shot up as this would be inconsiderate and unaffordable for the communities served by the municipality.

The following are the key budget assumptions used to prepare the annual budget with the guidance of National Treasury, NERSA, and SALGBC –

- a) 13.07% increase on electricity tariffs
- b) 15.63% increase on Electricity purchases
- c) 6.7% provision for employee costs which is CPI + 1.5% SALGBC Circular no. 6/2018
- d) 5,2% for all other expenses, and
- e) 6% for revenue municipal Tariffs

The Public Consultations

As detailed in the later paragraphs, the municipality consulted with the communities in relation to this budget and their inputs incorporated before finalization and final approval by council. The annual budget as compiled for the 2019/20 financial year and the MTREF therefore addresses priorities as per the IDP consultation processes, bearing in mind the limited resources that the municipality has at its disposal. As indicated in earlier paragraphs, the leading need by the communities is water reticulation, electrification and access roads, the budget is biased towards these. The budget also endeavors to allocate resources for construction and maintenance of access roads that ensure communities have access to schools, clinics and other basic necessities. Sport development is crucial for social cohesion, and central to this is the construction of infrastructure that would ensure that youths in the communities have access to

sporting facilities. The budget therefore allocates resources to such, as prioritized by communities.

Policy Review

The municipal council has reviewed a number of policies, proposing amendments to these policies and these are detailed in the later paragraphs in more detail. Most of the adjustments that have been proposed are necessitated by developments and changes in the requirements of key regulatory institutions like the National Treasury and the South African Revenue Services. This includes the requirements of the central supplier database where all service providers in South Africa must be registered before they can do business with the organs of state. The South African Revenue service introduced new ways of tax compliance status verification and new procedures were also issued to deal with service providers who are not tax compliant.

These development therefore necessitated improvements or changes to the Supply Chain Management Policy.

The National Treasury also introduced a guide for municipalities to develop a Supply Chain Management Policy for Infrastructure Procurement. This policy, as the name indicates, is meant to be specific on the procurement of infrastructure, and that the designed gates, at which there needs to be appropriate approval are set and understood.

The preparation of the budget has relied mainly on the statistics as provided in the Census of 2011 and the recent release. Although this has been the basis, we have kept in mind the growth of communities we serve within the municipality. The assumptions utilized in the compilation of this budget have also been based on the guidance provided by the National Treasury on the inflationary indicators to be utilized. The guidance has also touched on the requirements and expectations from the National Energy Regulator of South Africa (NERSA) on the percentage increase that can be effected on electricity tariffs.

Measureable Performance Objectives and Indicators

As part of the IDP and budget compilation process, management has identified the strategic objectives and performance indicators that would enable the municipality to achieve on the mandated powers and functions. These have been set out in the IDP with measureable performance indicators, and the budgeted amounts for the 2019/20 financial year and the two outer years. This information has further been detailed more in the draft Service Delivery Budget Implementation Plan for the 2019/20 financial year which must be approved by the Mayor at least 28 days after the adoption of the budget. The objectives have further been provided with projects that will be implemented to achieve the set targets and these projects have been supported by project implementation plans for each of the projects.

In view of the aforementioned, the following table is a consolidated overview of the proposed 2019/20 Medium-term Revenue and Expenditure Framework:

Table 1 Consolidated Overview of the 2019/20 MTREF

The table above shows the summary of the annual budget for the 2019/20 financial period with the outer years. The table shows that the expected revenue for the 2019/20 financial year adds up to just above R437 million. The revenue is mainly expected from grant funding to the value of R347.9 million and this forms about 79.5% of the total revenue budget.

The municipality has seen a slight improvement in the 2018/19 financial year in the revenue generated from refuse. We have a strong belief that a lot more still needs to be done to ensure that there are surpluses realized from this trading service and we are able to augment and improve on the current service delivery to the communities.

We forecast that an amount of R37.4 million will be generated from electricity distribution as a revenue source.

The employee related costs show a slight increase as a result of percentage increase resulting from the anticipated agreements in the Bargaining Council. The basis of the budgeted amount for employee related costs is on the approved organizational structure which should enable the municipality to achieve its objectives. The employee related costs are at 29.8% of the budgeted operational expenditure excluding remuneration of councillors.

a. REVENUE

Anticipated revenues look to have increased compared to the 2018/19 budget and this is due to the increase in grants as may be seen on the table above indicating the grants that have been confirmed for the municipality. There was also an increase in both the original MIG and INEP allocations for the year. These have contributed in an increase in overall revenue anticipated. The biggest increase seen was on the equitable share of R20 million.

b. EXPENDITURE

MM's Office and Council expense

This has taken into account submissions made during the budget sessions and these have been taken into account using the set limits for the overall expenditures and then using those to reprioritise.

Budget and Treasury

The major contributors are depreciation, external audit fees. Significant projects in the department are those of the review of the infrastructure fixed assets register, implementation of the contract management findings and action plan thereof.

Corporate Services

The major expenditures relate to repairs of municipal vehicles, fuel and oil, ICT licenses, SALGA levies, website maintenance, insurance for municipal assets and employees including councillors, telephone and fax as well as other operational expenses.

Development Planning

The department has made provisions for valuation services, Spluma, Tourism, agricultural events and development of SMME's including any support that is provided by the municipality to those. There are also provisions for surveying of municipal properties including the legal fees involved in the process.

Community and Social Services

The department has made provision for the rehabilitation of the landfill site, provision of security services, public safety awareness campaigns, the operation and maintenance of the municipal pound, provision of free basic energy, protective clothing and other uniforms. The department on top of the EPWP grant funded casuals has made a provision for more casual labour to assist in the refuse removal services of the municipality. They have also requested overtime to be allocated more funds to cater for public holidays and other special events.

Road Engineering

The allocations made relate to the day to day operations of the department. There are also allocations for fuel and oil for the municipal plant which will be used to maintain some of the roads within the municipality. A provision of R11 million has been made to cater for external road maintenance in the light of the recent inclement weather that caused damages to the gravel roads and bridges and CBD maintenance, and R3.8 million for maintenance of municipal buildings.

Electricity

The department's biggest allocation has gone to the electricity purchases which is paid to Eskom for the supply of electricity. There are also allocations of over R4.4 million that are made for purchase of electrical material and maintenance of electrical infrastructure.

Included in the contracted services budget are the following infrastructure projects that will be transferred to Eskom when they are completed during the 2019/20 financial year:

- | | |
|--|-------------|
| • Electrification of Ukhalo, Mdikisweni, Pelele | R 3 700 000 |
| • Electrification of Diphini, Mandlobe, Sigodlweni | R 3 200 000 |
| • Electrification of Mathwenu Village | R 2 800 000 |
| • Electrification of Ludeke | R 8 787 906 |

These are will all be funded from the INEP Grant.

1.5 Operating Revenue Framework

Mbizana Local Municipality strives to provide its communities with the required services and for it to succeed in doing that, it has to ensure that it has an operating revenue framework that ensures that it is able to fund its operations. This talks to the fact that there must be strategies in place to maximize the collection of revenue from the streams that already exist, but as well identify new

revenue streams to augment the existing ones. A revenue enhancement strategy was approved by the council and management is currently busy with the implementation of that plan.

The municipality's revenue strategy is built around the following key components:

- National Treasury's guidelines and macroeconomic policy;
- Growth in the Municipal area and continued economic development;
- Efficient revenue management;
- Electricity tariff increases as approved by the National Electricity Regulator of South Africa (NERSA);
- Achievement of full cost recovery of specific user charges especially in relation to trading services;
- Determining the tariff escalation rate by establishing/calculating the revenue requirement of each service;
- The municipality's Property Rates Policy approved in terms of the Municipal Property Rates Act, 2004 (Act 6 of 2004) (MPRA) as amended;
- Increase ability to extend new services and recover costs;
- The municipality's Indigent Policy and rendering of free basic services; and
- Tariff policies of the Municipality.

In preparing the budgets, realistically anticipated revenues have been considered, and as has been indicated several times earlier, the tough economic conditions reflect on the reduces anticipated revenues. The property rates, electricity all show a slight increase and the main consideration has been the declining trend over the past few years, coupled with the weak performance of the said items.

In line with the formats prescribed by the Municipal Budget and Reporting Regulations, capital transfers and contributions are excluded from the operating statement, as inclusion of these revenue sources would distort the calculation of the operating surplus/deficit.

The own revenue generation of the municipality is pillared mainly by electricity distribution and levying of property rates. Although the municipality to a larger extent relies on grants, these own revenue sources remain very important and all efforts need to be made to ensure that maximum returns are realized on them.

Property Rates depend on the availability of the updated valuation roll to be levied. A valuation roll that has been finalized is coming to an end of its validity although it is under constant challenge from the rate payers. The availability of the valuation roll has meant that a detailed and involved process is followed to determine the tariff to be levied instead of using unreliable methods of calculations. The latest valuation roll, updated with the supplementary valuations was utilized in arriving at the possible amounts that can be raised out of property rates.

The property rates tariffs have remained unchanged over the medium term to accommodate the possible impact of the new valuation that will be implemented. At this stage it is not possible to make an analysis of the change in the property values as there are still issues with missing properties on the new valuation that are still being attended to including changes in classification of the properties. The final valuation with its supplementary will be presented to council before the 30th of June 2019 and if there is a need to revise these tariffs a report will be prepared and submitted to council structures for consideration.

The municipality remains committed into ensuring that tariffs implemented do not put a further strain on the consumer's pockets that are already over stretched

Electricity distribution forms a significant part of the own funding by the municipality. The performance of this stream of revenue has been under considerable strain over the past few years, and it has become difficult to expect an immediate change out of it, however measures implemented over the past financial years and during the year have begun to show some positive results which still need to be monitored closely.

The table above shows the operating grants that the municipality has been allocated for the 2019/20 financial period and the MTREF. The Equitable Share has increased to R260 million and the municipality revenue has grant funding in the excess of R348 million. It is important to note though that INEP and MIG have also decreased putting more pressure on the municipal resources when it comes to funding of the capital budget.

- **Financial Management Grant (FMG):** This grant is meant to assist in ensuring that financial management systems of the municipality are functioning and that the staff complement at the Budget and Treasury Office is adequately capacitated in terms of skill and understanding of accounting and municipal finance.
- **Municipal Infrastructure Grant (MIG) (Operational):** The MIG is meant for the development of infrastructure within the municipality, but then 5% of that is utilized for

project management, payment of salaries of specific staff members and planning for those infrastructure projects.

- **Department of Sport and Culture – Library:** The grant is meant to assist in the running of the library, including ensuring that the library is appropriately stocked with books.
- **Integrated National Electrification Program (INEP):** The municipality utilizes this grant to speed up electrification in the villages to ensure universal access within the Mbizana jurisdiction. This becomes operational due to the fact that the municipality is not licensed to provide electrification in the villages and therefore these get transferred to Eskom at the end of implementation.
- **EPWP Greenest Municipality Grant:** This is a new provincial grant that has been allocated to the municipality for the first time and meetings are still being held to ensure full compliance with its operational requirements.

• **Tariff Setting for the 2019/20 and MTREF Period**

As part of generating own revenue, the municipality needs to set tariffs for the revenue streams for which it has been made responsible for in terms of various legislations. For example the Municipal Property Rates Act empowers the municipality to levy rates on all ratable properties.

A number of considerations have been taken into consideration in setting up the tariffs to be utilized from July 01, 2019 as indicated in earlier paragraphs. The municipality has not been immune to the adverse economic conditions that are currently experienced throughout the country. These conditions have been taken into consideration as the tariffs were being set and all the input costs that go into providing the specific services.

1.6.1.1 Property Rates

Property rates cover the cost of the provision of general services. Determining the effective property rate tariff is therefore an integral part of the municipality's budgeting process. In determining the tariff, the municipality has considered the values of properties on which the municipality will levy rates, the amounts desirable from rates for budget purposes, and the historic tariffs of the previous financial years.

The Property Rates policy is one of the most important documents that we utilise in the determination of property rates. It should be kept in mind though that the Municipal Property Rates Act remains the reference point for this policy.

The following stipulations in the Property Rates Policy are highlighted:

- The first R15 000 of the market value of a property used for residential purposes is excluded from the rate-able value (Section 17(h) of the MPRA). In addition to this rebate, a further R40 000 reduction on the market value of a property will be granted in terms of the municipality's own Property Rates Policy. This is maintained from the previous financial year as there has not been any significant changes to the values of the properties;
- Details of further rebates and reductions are provided in the municipality's Property Rates Policy and the Indigent Policy.

The tariff structure has remain basically unchanged for residential properties as shown in the table below. However, it was brought into our attention by the National CoGTA that we had in the previous financial years unfairly charge government departments a higher rate than all other properties whilst these are not in the business of making profits. The vacant land has been raised higher to discourage hoarding of pieces of land that have not been developed. We have therefore taken these into consideration in arriving at the tariff as shown below

Table 5 Comparison of proposed rates to be levied for the 2019/20 financial year

PROPERTY RATES TARIFFS	2017/18	2018/19	2019/20
	c/R	c/R	c/R
Residential	0,0060	0,0060	0,0060
Business And Commercial	0,0120	0,0120	0,0120
State Owned	0,0090	0,0090	0,0090
Vacant Land	0,0090	0,0090	0,0090

The above tariffs have remained unchanged over the medium term to accommodate the possible impact of the new valuation that will be implemented. At this stage it is not possible to make an analysis of the change in the property values as there are still issues with missing properties on the new valuation that are still being attended to including changes in classification of the

properties. The final valuation with its supplementary will be presented to council before the 30th of June 2019 and if there is a need to revise these tariffs a report will be prepared and submitted to council structures for consideration.

The municipality remains committed into ensuring that tariffs implemented do not put a further strain on the consumer's pockets that are already over stretched

1.6.1.2 Sale of Electricity and Impact of Tariff Increases

The municipality distributes electricity in the town area of Mbizana and to do this, a service charge must be levied in order to recover the costs incurred. There has been a noticeable increase in the revenue generated from electricity as a result of projects undertaken that has seen losses reduced. However there is still a lot of work to be done to ensure that this service is at least able to sustain itself, and at some point be able to provide enough revenue for other service delivery imperatives.

As guided by National Treasury Circular 93 & 94, during the draft budget there was very minimal increase in the electricity tariffs and this is informed by the percentage increase that was applied for all other services while a decision was awaited from NERSA. During the preparation of the final budget NERSA published approved percentage increases that have then been applied in preparation of this budget and application for tariffs. We have therefore applied a 13.07% maximum increase. We have however made a provision of a higher increase of 15.63% increase on electricity purchases budget. This is what has been factored in and the tariffs are as follows:-

Registered indigents will again be granted 50 kWh per 30-day period free of charge.

1.6.1.3 Waste Removal and Impact of Tariff Increases

Currently solid waste removal is operating at a deficit. It is widely accepted that the rendering of this service should at least break even, which is currently not the case. The Municipality will have to implement a solid waste strategy to ensure that this service can be rendered in a sustainable manner over the medium to long-term. The main contributors to this deficit are repairs and maintenance on vehicles, increases in general expenditure such as petrol and diesel and the cost of remuneration. Considering the deficit, it is recommended that a comprehensive investigation into the cost structure of solid waste function be undertaken, and that this include investigating alternative service delivery models. The outcomes of this investigation will be incorporated into the next planning cycle.

The following table compares current and proposed amounts payable from 1 July 2019:

Table 6 Comparison between current waste removal fees and increases

1.7 Operating Expenditure Framework

The Municipality's expenditure framework for the 2019/20 budget and MTREF is informed by the following:

- Balanced budget constraint (operating expenditure should not exceed operating revenue) unless there are existing uncommitted cash-backed reserves to fund any deficit;
- Funding of the budget over the medium-term as informed by Section 18 and 19 of the MFMA;
- The capital programme is aligned to the asset renewal strategy and backlog eradication plan;
- Operational gains and efficiencies will be directed to funding the capital budget and other core services; and
- Strict adherence to the principle of *no project plan no budget*. If there is no business plan no funding allocation can be made.

The following table is a high level summary of the 2019/20 budget and MTREF (classified per main type of operating expenditure):

EC443 Mbizana - Table A4 Budgeted Financial Performance (revenue and expenditure)

The budgeted allocation for employee related costs for the 2019/20 financial year totals R108.6 Million. Based on the guidelines on circular 94 and 94, salaries are factored into this budget at projected CPI plus 1.5 percent for the 2019/20 financial year. An annual increase of 5.4 per cent

has been included in the two outer years of the MTREF. As part of the planning, all departments have been requested to submit their personnel requirements for the years budgeted for. This includes existing positions that are currently filled, vacant positions that will be filled and as such should be budgeted for.

The cost associated with the remuneration of councilors is determined by the Minister of Co-operative Governance and Traditional Affairs in accordance with the Remuneration of Public Office Bearers Act, 1998 (Act 20 of 1998). The most recent proclamation in this regard has been taken into account in compiling the Municipality's budget.

Bulk purchases are directly informed by the purchase of electricity from Eskom. The annual price increases have been factored into the budget appropriations and directly inform the revenue provisions.

Other expenditure comprises of various line items relating to the daily operations of the municipality. This group of expenditure has also been identified as an area in which cost savings and efficiencies can be achieved.

- **Free Basic Services: Basic Social Services Package**

The social package assists households that are poor or face other circumstances that limit their ability to pay for services. To receive these free services the households are required to register in terms of the Municipality's Indigent Policy.

The cost of the social package of the registered indigent households is largely financed by national government through the local government equitable share received in terms of the annual Division of Revenue Act.

The table above gives an overview of the operational expenditure per functional classification or by functional areas within the municipality.

- **Priority given to repairs and maintenance**

Aligned to the priority being given to preserving and maintaining the Municipality's current infrastructure, the 2019/20 budget and MTREF provide for extensive growth in the area of asset maintenance. In terms of the Municipal Budget and Reporting Regulations, operational repairs and maintenance is not considered a direct expenditure driver but an outcome of certain other expenditures, such as remuneration, purchases of materials and contracted services. Considering these cost drivers, the following table is a consolidation of all the expenditures associated with repairs and maintenance:

Table 10 Operational repairs and maintenance

Repairs and Maintenance	8										
Employee related costs											
Other materials											
Contracted Services											
Other Expenditure		5 292	5 017	4 549	12 851	10 256	10 256	10 256	20 372	21 390	22 460
Total Repairs and Maintenance Expenditure	9	5 292	5 017	4 549	12 851	10 256	10 256	10 256	20 372	21 390	22 460

An amount of R20.3 million has been set aside in the 2019/20 financial period for the maintenance of municipal assets. The amount is lower than the proposed treasury percentages, the municipality has taken a decision to rather purchase municipal plant and machinery which will be used to repair road infrastructure. This will ensure that there is improved access to all the wards in the municipality. There is also an increased need to repair other infrastructure assets like the municipal offices, community halls and the municipal vehicles.

The table above shows the budgeted cash reserves and these are based on the current cash reserves in the municipality. As indicated by the table, there is a need to ensure that these reserves are preserved and built up again. This is after these reserves have been made available for infrastructure development within the municipality.

1.8 Capital expenditure

The following table provides a breakdown of budgeted capital expenditure by vote:

For the 2019/20 Annual budget, there is a decrease in the capital budget of the municipality. This accounts for about R77 million of the budget and this is mainly funded from the MIG for roads, community facilities and Sport facilities and INEP for electrification with the remainder funded from own funds.

1.9 Annual Budget Tables

The following pages present the main budget tables as required in terms of section 8 of the Municipal Budget and Reporting Regulations. These tables set out the municipality's 2019/20 budget and MTREF as approved by the Council. Each table is accompanied by *explanatory adopts* on the facing page.

Explanatory adopts to MBRR Table A1 - Budget Summary

1. Table A1 is a budget summary and provides a concise overview of the municipality's budget from all of the major financial perspectives (operating, capital expenditure, financial position, cash flow, and MFMA funding compliance).
2. The table provides an overview of the amounts for possible approval by Council for operating performance, resources deployed to capital expenditure, financial position, cash and funding compliance, as well as the municipality's commitment to eliminating basic service delivery backlogs.
3. Financial management reforms emphasizes the importance of the municipal budget being funded. This requires the simultaneous assessment of the Financial Performance, Financial Position and Cash Flow Budgets, along with the Capital Budget. The Budget Summary provides the key information in this regard:
 - a. The operating surplus/deficit (after Total Expenditure) is positive over the MTREF
 - b. Capital expenditure is balanced by capital funding sources, of which
 - i. Transfers recognized is reflected on the Financial Performance Budget;
 - ii. Borrowing is incorporated in the net cash from financing on the Cash Flow Budget
 - iii. Internally generated funds is financed from a combination of the current operating surplus and accumulated cash-backed surpluses from previous years. The amount is incorporated in the Net cash from investing on the Cash Flow Budget. The fact that the municipality's cash flow remains positive, and is improving indicates that the necessary cash resources are available to fund the Capital Budget.
4. Efforts have been made in compiling the budget to ensure that the budget is cash backed. This is reflected by the positive cash flows that the municipality has. This requires the municipality to maintain its prudence to ensure that positive cash flows are maintained over the long term whilst ensuring that there is spending on projects that make a difference to people's livelihoods.
5. Even though the Council is placing great emphasis on securing the financial sustainability of the municipality, this is not being done at the expense of services to the poor. The section of Free Services shows that the amount spent on Free Basic Services and the revenue cost of free services provided by the municipality continues to increase. In addition, the municipality continues to make progress in addressing service delivery backlogs.

Explanatory adopts to MBRR Table A2 - Budgeted Financial Performance (revenue and expenditure by functional classification)

The above table shows the allocations made by the municipality to the different classes or functions within the municipality and the contributions that will be made per standard class. It is pleasing to note that the table shows that the municipality's bigger share is allocated to service deliver functions as well as governance and administration. These are complementary in nature hence the allocations.

Listed in the table above are the revenue and expenditure classifications for all the departments within the municipality.

Explanatory adopts to MBRR Table A3 - Budgeted Financial Performance (revenue and expenditure by municipal vote)

1. Table A3 is a view of the budgeted financial performance in relation to the revenue and expenditure per municipal vote. This table facilitates the view of the budgeted operating performance in relation to the organizational structure of the Municipality. This means it is possible to present the operating surplus or deficit of a vote.

Explanatory adopts to Table A5 - Budgeted Capital Expenditure by vote, functional classification and funding source

The table above shows capital expenditure by vote and functional classification as well as funding for the expenditure forecasted.

This shows how the municipality's capital budget funding is highly dependent on grant funding. There is also a portion on the funding of electricity infrastructure that will be going to the repayment of the front loading arrangement that was made for the year under implementation. This reduces the amount available for capital budget funding.

Explanatory adopts to Table A6 - Budgeted Financial Position

1. Table A6 is consistent with international standards of good financial management practice, and improves understandability for councilors and management of the impact of the budget on the statement of financial position (balance sheet).
2. This format of presenting the statement of financial position is aligned to GRAP1, which is generally aligned to the international version which presents Assets less Liabilities as "accounting" Community Wealth. The order of items within each group illustrates items in order of liquidity; i.e. assets readily converted to cash, or liabilities immediately required to be met from cash, appear first.
3. The municipal equivalent of equity is Community Wealth/Equity. The justification is that ownership and the net assets of the municipality belong to the community.
4. Any movement on the Budgeted Financial Performance or the Capital Budget will inevitably impact on the Budgeted Financial Position. As an example, the collection rate assumption will impact on the cash position of the municipality and subsequently inform the level of cash and cash equivalents at year end. Similarly, the collection rate assumption should inform the budget appropriation for debt impairment which in turn would impact on the provision for bad debt. These budget and planning assumptions form a critical link in determining the applicability and relevance of the budget as well as the determination of ratios and financial indicators. In addition the funding compliance assessment is informed directly by forecasting the statement of financial position.

Explanatory adopts to Table A8 - Cash Backed Reserves/Accumulated Surplus Reconciliation

The above table shows how the municipality's funding will be applied and the targets set for cash backed reserves over the medium. This is informed by anticipated year end targets as well as the plans to be implemented over the medium-term, especially on the revenue management, debt collection as well as expenditure management.

Part 2 – Supporting Documentation

2.1 Overview of the annual budget process

A budget and IDP process plan was tabled to the municipal council 10 months before the start of the 2018/19 financial year as required by the Municipal Finance Management Act. The process plan sets out a road map with timeframes and tasks clearly set with responsible officials or institutions. The process plan in part of the IDP document and efforts have been made to ensure that these timelines are adhered to the latter. The process involves the consultation with the communities which was done during November and December 2018. These consultations inform the inputs into the IDP and the Budget.

A draft budget will be tabled to council before 31 March 2019. Inputs will then be sought from all stakeholders within the communities and therefore community consultations will be carried out in April and May 2019. The final budget adoption will have to take into consideration these inputs.

Other inputs were received from the Provincial Treasury after having received the draft, and an engagement between the Provincial Treasury and the Municipality took place. A review document was produced by the Provincial Treasury and concerns raised in this document and the engagement have been, as far as possible, taken into consideration in the final compilation.

2.2 Overview of budget related-policies

The budget preparation process cannot be separated from the review of related policies that enable the implementation of the budget. The following is a brief look at the budget related policies and where applicable, changes that have been proposed during the budget review:-

2.2.1 Review of credit control and debt collection policy

- It is vital to the long term financial viability of the Mbizana Local Municipality that it collects the revenues (such as service charges, rates and taxes) due to it for services rendered. In terms of s96 of the Systems Act, a municipality:
- must collect all money that is due and payable to it subject to this Act and any other applicable legislation; and
- For this purpose, must adopt, maintain and implement a credit control and debt collection policy, which is consistent with rates and tariff policies and complies with the provisions of this Act. This means that appropriate credit control and debtors mechanisms must be maintained. The services provided by the Mbizana Local Municipality include electricity, refuse removal and other municipal services.

2.2.2 Supply Chain Management Policy

The SCM policy aims to ensure that Mbizana Local Municipality procures goods and services in a manner that is efficient, timely and cost-effective, ensures customer satisfaction, pursues socio-economic objectives through a preference system and demonstrates compliance with the constitution and all relevant legislation.

A few changes have been proposed to the SCM Policy and these have been necessitated mainly by changes introduced by the National Treasury as well as the South African Revenue Services.

Central Supplier Database: The National Treasury has introduced a requirement that all service provider purporting to do business with government institutions must be registered in a

central database maintained by the National Treasury. Important information that relates to the registration of all companies and compliance with various requirements of various institutions is monitored through this database. Our policy should therefore make reference to this.

SARS Pin: The SARS has in the past made use of the tax clearance certificate, valid for a year, to confirm the good standing of companies that do business with the municipality. All companies have now been issued with a SARS pin which enables organs of state to directly enquire on the status of the companies at any given time. This has made the submission of the tax certificate not compulsory, but that of the SARS Pin. This development must again be reflected in the SCM policy of the municipality.

Preferential Procurement Regulations, 2017: The Minister of Finance, in terms of section 5 of the Preferential Procurement Policy Framework Act, 2000, made the regulations set out in the schedule, and issued in terms of a government gazette in January 2017. The Preferential Procurement Regulations 2017 therefore set out a number of regulations that must be implemented by all organs of the state from April 01, 2017. Some of the regulations set out affect the municipality's Supply Chain Management policy, and as such the policy must be amended to give effect to those.

The following are some of the major changes that the regulations present:-

- **Pre-qualification criteria for preferential procurement:** Where an organ of state decides to apply pre-qualification criteria to advance certain designated groups, an organ of state must advertise the tender with specific tendering condition that one or more of the type of tenderers may respond. These include amongst others:-
 - A tenderer having a stipulated minimum B-BBEE status level of contributor;
 - An EME (exempt micro enterprise) or QSE (qualifying small business);
 - A tenderer subcontracting a minimum of 30% to:-
 - An EME or QSE which is at least 51% owned by black people;
 - An EME or QSE which is at least 51% owned by black people who are youth;
 - An EME or QSE which is at least 51% owned by black people who are women; and a number of other criteria as stated in the regulations.
- **80/20 preference point system for acquisition of goods or services for Rand value equal to or above R30 000 and up to R50 million:** This point scoring system is now applicable to all procurement from R30 000 to R50 million where as it before only up to R1 million.
- **90/10 preference point system for acquisition of goods or services for Rand value above R50 million:** The point scoring system that used to be applicable from the Rand value of R1 million is now only applicable from a Rand value of more than R50 million.
- **Subcontracting after award of tender:** The regulations make specific considerations relating to subcontracting after the award and the following points are important:
 - A person awarded a contract may only enter into a subcontracting arrangement with the approval of the state;
 - A person awarded a contract may not subcontract more than 25% of the value of the contract to any other enterprise that does not have an equal or higher B-BBEE status level of contributor than the person concerned, unless the contract is subcontracted to an EME that has the capability and ability to execute the subcontract.

2.2.3 Budget Policy

The objective of the budget policy is to set out:

- The principles which the municipality will follow in preparing each medium term revenue and expenditure framework budget,
- The responsibilities of the mayor, the accounting officer, the chief financial officer and other senior managers in compiling the budget, and
- To establish and maintain procedures to ensure adherence to Mbizana's IDP review and budget processes.

This policy also needs to see a number of changes which are necessitated by the introduction of mSCOA. The various segments introduced with mSCOA have meant that the levels of authority cannot be left unchanged as some transfers and virements require a higher level of authorization, up to a level where council must take a decision.

2.2.4 Cash Management and Investment Policy

An Accounting Officer has an obligation to ensure that cash resources are managed as effectively, efficiently and economically as possible. Effective cash management and competitive investment ensures both short-term and long-term viability and sustainability of the municipality. Hence, it is critical for the Mbizana Local Municipality to have its own Cash Management and Investment Policy located within the local government legislative framework.

The primary and ultimate goal of the investment of funds is to secure the safety, integrity and wholeness of the invested capital, managing liquidity requirements and ensuring the earning of the highest possible return on invested capital at minimum risk (i.e. whilst not risking the partial or total loss of invested capital), within the parameters of authorised instruments as per the MFMA.

2.2.5 Tariff Policies

In terms of section 62 (1) of the Local Government: Municipal Finance Management Act (MFMA), Act no 56 of 2003, the Accounting Officer of a municipality is responsible for managing the financial administration of the municipality, and must for this purpose take all reasonable steps to ensure that, inter alia, the municipality has and implements a tariff policy referred to in section 74 of the Local Government: Municipal Systems Act (MSA), Act no 32 of 2000 as amended.

In terms of section 74 of the Municipal Systems Act the municipal council hereby adopts a tariff policy on the levying of fees for municipal services provided by the municipality itself or by way of service delivery agreements.

2.2.6 Property rates policy

This policy guides the annual setting (or revision) of property rates tariffs. It does not necessarily make specific property rates tariff proposals. Details pertaining to the applications of the various property rates tariffs are annually published in the Provincial Gazette and the municipality's schedule of tariffs, which must be read in conjunction with this policy.

In imposing the rate in the rand for each annual operating budget component, the municipality shall grant exemptions, rebates and reductions to the categories of properties and categories of owners as allowed for in this policy document.

2.2.7 Asset management policy

The objective of this Asset Management Policy is to ensure that the municipality:

- has consistent application of asset management principles;
- implements accrual accounting;
- complies with the MFMA and other related legislation;
- correctly accounts for Assets under the GRAP accounting framework;
- safeguards and controls the assets of the municipality; and
- Optimizes asset usage.

During the review it was identified that the Asset Management committee did not include the councilors responsible for asset management and this was the proposed change to the policy.

2.2.8 SCM Policy for Infrastructure Procurement and Delivery Management

The National Treasury issued a circular in October 2015 in relation to the introduction of this policy. The intention of the circular was to a policy that would enable a municipality to separate the supply chain management requirements for general goods and services from those for infrastructure delivery. The infrastructure delivery encompasses a whole range of competencies including planning, technical, administrative and managerial actions associated with the construction, supply, renovation, rehabilitation, alteration, maintenance, operation or disposal of infrastructure.

The circular has two attachments or annexures to it, which are,

- Model SCM Policy for Infrastructure Procurement and Delivery Management; and
- National Treasury Standard for Infrastructure Procurement and Delivery Management (SIPDM)

The model SCM Policy is intended to give a guide to the municipality as to what the contents of the policy should be, while the Standard for Infrastructure provides standards that must be complied with in the implementation of the policy.

Council must then consider the model policy, make its own inputs and approve it for implementation from July 01, 2018.

The policy is structured in the following way:-

General Requirements

- Delegations
- Implementation of SIPDM
- Supervision of the Infrastructure delivery management unit – BTO and ES
- Objections and Complaints
- Resolution of Disputes

Control Framework

- Gateway reviews
- General
- Stages and End-of-Stages deliverables

Infrastructure Delivery Management

- Institutional arrangements
- Acquisition management
- Reporting

Infrastructure Procurement

- Procurement Documents
- Developmental procurement policy
- Payment of creditors
- Approval to utilize specific procurement procedures
- Receipt and safeguarding of submissions
- Opening of submission

Table 2		
Stage		End-of-Stage deliverables
No.	Name	
0	Project Initiation	An initiation report which outlines the high-level business case together with the estimated project cost and proposed schedule for a single project or a group of projects having a similar high-level scope
1	Infrastructure Planning	An infrastructure plan which identifies and prioritizes projects and packages against a forecasted budget over a period of at least five years
2	Strategic Resourcing	A delivery and/or procurement strategy which, for a portfolio of projects, identifies the delivery strategy in respect of each project or package and, where

			needs are met through own procurement system, a procurement strategy
3	Pre-feasibility		A prefeasibility report which determines whether or not it is worthwhile to proceed to the feasibility stage
	Preparation and brief		A strategic brief which defines project objectives, needs, acceptance criteria and client priorities and aspirations, and which sets out the basis for the development of the concept report for one or more packages
4	Feasibility		A feasibility report which presents sufficient information to determine whether or not the project should be implemented
	Concept and viability		A concept report which establishes the detailed brief, scope, scale, form and control budget, and sets out the integrated concept for one or more packages
5	Design Development		A design development report which develops in detail the approved concept to finalize the design and definition criteria, sets out the integrated developed design, and contains the cost plan and schedule for one or more packages
6	Design Documentation	6A Production information	Production information which provides the detailing, performance definition, specification, sizing and positioning of all systems and components enabling either construction (where the constructor is able to build directly from the information prepared) or the production of manufacturing and installation information for construction
		6B Manufacture, fabrication and construction information	Manufacture, fabrication and construction information produced by or on behalf of the constructor, based on the production information provided for a

		package which enables manufacture, fabrication or construction to take place
7	Works	Completed works which are capable of being occupied or used
8	Handover	Works which have been taken over by the user or owner complete with record information
9	Package Completion	Works with notified defects corrected, final account settled and the close out report issued

2.3 Overview of budget assumptions

The budget compilation has been driven by a few assumptions based on the information available to the municipality. As indicated in the earlier paragraphs, the MFMA Treasury Budget Circulars have been used as a basis for the assumptions made. The inflationary outlook as per the circulars is as follows:

Fiscal year	2018/19 Estimate	2019/20	2020/21 Forecast	2021/22 Forecast
Consumer Price Inflation – CPI	4.7%	5.2%	5.4%	5.4%

The National Energy Regulator of South Africa has not yet indicated a proposed increase for Municipalities.

The employee related costs increments are still being negotiated and 2019/20 will see the 2nd year of the implementation of that agreement. The budgetary provision of the 2019/20 financial year should then be provided for as follows:-

- 2019/20 Fin Year – CPI + 1.5%

May 2019

2.7 Contracts having future budgetary implications

In terms of the municipality's Supply Chain Management policy, no contracts are awarded beyond the medium-term revenue and expenditure framework (three years). In ensuring adherence to this contractual time frame limitation, all reports submitted to either the Bid Evaluation and Adjudication Committees must obtain formal financial management comments and budget confirmation from the Budget and Treasury office.

2.9 Legislation compliance status

Compliance with the MFMA implementation requirements have been substantially adhered to through the following activities:

1. In year reporting

Reporting to National Treasury in electronic format was fully complied with on a monthly basis. Section 71 reporting to the Executive Mayor (within 10 working days) is improving.

2. Internship programme

The Municipality is participating in the Municipal Financial Management Internship programme and has employed five interns undergoing training in various divisions of the Financial Services Department. Of the interns trained over the years 8 were absorbed within the municipality's budget and treasury office while 3 have found employment in other municipality's and are now at managerial level. Since the introduction of the Internship programme the Municipality has successfully employed and trained 19 interns through this programme.

3. Budget and Treasury Office

The Budget and Treasury Office has been established in accordance with the MFMA.

4. Audit Committee

An Audit Committee has been established and is fully functional. This is despite resignations that have happened in recent times, but the council has been able to appoint other members within reasonable periods of time.

5. Service Delivery and Implementation Plan

The detail SDBIP document is at a draft stage and will be finalized after approval of the 2019/20 MTREF in May 2019 directly aligned and informed by the 2019/20 MTREF.

6. Annual Report

Annual report is compiled in terms of the MFMA and National Treasury requirements.

2.10 Municipal manager's quality certificate

I LUVUYO MATHAKA, municipal manager of Mbizana Local Municipality, hereby certify that the annual budget and supporting documentation have been prepared in accordance with the Municipal Finance Management Act and the regulations made under the Act, and that the annual budget and supporting documents are consistent with the Integrated Development Plan of the municipality.

Print Name LUVUYO MATHAKA

Municipal manager of Mbizana Local Municipality (EC443)

Signature 

Date 30 MAY 2019
